Bruce also discussed extensively how outsourcing has become a State problem and it doesn't only apply to Caltrans employees. A Caltrans employee costs the State \$120,000 to complete the job, while a consultant costs the State \$220,000 to complete the same job.

Bruce also touched on how the pay parity surveys are updated yearly. Range "E" was also touched upon and the possibility of that becoming a reality are very remote.

So far there are 3,000 Non-members working for Caltrans and 10,000 Members. It was also re-iterated that Supervisors and Managers are also represented by PEGC.
